What is this product?

Type

This product is an investment fund.

Term

The Fund is established for an unlimited duration, with the possibility for the Board of Directors to decide the termination of the Fund at its sole discretion.

Objectives

Flexible Allocation Fund belongs to the category of Fund of Funds.

The Fund seeks to increase the value of its assets over the long term by implementing a diversified and actively managed portfolio of UCITS funds to seek exposure to diversified and multi-asset classes (including equities and debt instruments), with no specific restriction in the proportion in any investment category.

Allocations between asset classes will be made at the investment manager's discretion to either maintain a dynamic allocation between equities and debt instruments or to adopt opportunistic investment strategies depending on equity and debt instrument market conditions.

On an ancillary basis the Fund may invest in Money Market Instruments or Cash (up to 20% of its assets).

The Fund may invest in distressed assets up to 10% of the Fund's net assets.

This Fund is actively managed and is compared to the 35% * (50% MSCI Europe TR Net + 40% MSCI World ex Europe TR Net + 10% MSCI EM TR Net) + 45% Bloomberg Barclays Euro Aggregate TR Index 1-10 Year + 5% Bloomberg Barclays Global High Yield Corporate EUR Hedged + 2,5% JP Morgan EMBI Global

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between October 2021 and October 2023.

Moderate: this type of scenario occurred for an investment between March 2017 and March 2022.

Favourable: this type of scenario occurred for an investment between June 2016 and June 2021.

What happens if ABN AMRO Funds Flexible Allocation Fund is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should we default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of ABN AMRO Investment Solutions to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at www.abnamroinvestmentsolutions.com.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	812 EUR	1,660 EUR
Annual cost impact*	8.1%	3.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.1% before costs and 3.6% after costs.
