What is this product?

Type

This product is an investment fund.

Term

The Fund is established for an unlimited duration, with the possibility for the Board of Directors to decide the termination of the Fund at its sole discretion.

Objectives

Private Portfolio Equities belongs to the category of Single Manager Funds.

The Fund seeks to increase the value of its assets over the long term by investing in transferable equity securities of companies which are located worldwide (including emerging markets) and from any economic sector, without any restriction on tracking error.

The minimum asset allocation in such securities will be of 85% of the Fund's net assets.

The following restrictions will apply to the Fund:

- Minimum exposure to European equities (excluding Emerging markets): 30%
- Maximum exposure to Emerging Markets: 20%
- Maximum exposure to Small- and Mid-caps: 20%

Investments in debt securities do not exceed 15% of its net assets.

The Fund may invest for maximum 10% of its net assets in funds that have been selected in accordance with a number of qualitative and quantitative criteria.

Sustainable Investment Policy The sub-fund promotes environmental and social characteristics and qualifies as an investment product in accordance with article 8(1) of Regulation (EU) 2019/2088 on sustainability related disclosures in the financial services sector as set out in Book I.

In that respect, the eligible universe is determined by criteria such as but not limited to exclusion filters, as set out in Book I. The extra-financial analysis covered at least 70% of the portfolio.

The sub-fund will only invest in external funds that are Art.8 or Art.9

under SFDR or hold an European sustainability label. External funds may deviate from the Sustainability Investment Policy of the Management Company applying to direct investments. The derivative instruments are not covered by the ESG analysis.

Relation to the Reference Portfolio This Fund is actively managed and is compared to the 50% MSCI Europe TR Net + 40% MSCI World ex Europe TR Net + 10% MSCI EM TR Net for performance and risk level indicator purposes. However, the reference to this Reference Portfolio does not constitute any objective or limitation in the management and composition of the portfolio and the Fund does not restrain its universe to the Reference Portfolio's components. The Reference Portfolio does not evaluate or include its constituents on the basis of environmental and/or social characteristics and is therefore not aligned with the ESG characteristics promoted by the sub-fund.

Therefore, returns may deviate materially from the performance of the Reference Portfolio.

The base currency of the Fund is EUR.

Income is systematically reinvested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days).

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between December 2021 and February 2023.

Moderate: this type of scenario occurred for an investment between June 2014 and June 2019.

Favourable: this type of scenario occurred for an investment between October 2016 and October 2021.

What happens if ABN AMRO Funds Private Portfolio Equities is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should we default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	779 EUR	1,497 EUR
Annual cost impact*	7.8%	3.3%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.3% before costs and 7.0% after costs.

Composition of costs

One-off costs upon entry or exit		Annual cost impact if you exit after 1 year
